EDUCATION

Ph.D., Biochemical & Molecular Nutrition 2016 - 2019
Tufts Friedman School of Nutrition Science and Policy, Boston, MA
Dissertation: Genomic and epigenomic prediction of cardiovascular risk and modulation by diet

M.S., Biochemical & Molecular Nutrition, with concentration in Systems Genomics 2014 - 2016
Tufts Friedman School of Nutrition Science and Policy, Boston, MA

B.S., Chemical Engineering – *Magna cum laude* 2010 - 2014
Tufts University, Medford, MA

RESEARCH EXPERIENCE

Assistant Investigator, Massachusetts General Hospital, Boston, MA 2025 - present
Affiliations: Harvard Medical School (Assistant Professor), Broad Institute of MIT and Harvard
Lead an interdisciplinary research program focused on gene-environment interaction analysis for cardiometabolic disease prevention. Methodological research explores polygenic scores for interaction and the modeling of molecular ‘omics mediators. Applied research investigates genetic modification of the cardiometabolic response to omega-3 fatty acids and other dietary and lifestyle exposures. Also lead consortium efforts and working groups (TOPMed, CHARGE) and mentor trainees in genetic epidemiology and informatics.

Instructor, Massachusetts General Hospital, Boston, MA 2022 - 2025
Independent faculty role at MGH and Harvard Medical School, supported by a K01 award from the NIDDK. Research focus expanded the methodological and applied lines of research established during my postdoctoral fellowship.

Postdoctoral Fellow, Massachusetts General Hospital, Boston, MA 2019 - 2022
Advisor: Alisa K. Manning, Ph.D.
Developed methods for gene-environment interaction analysis in large-scale consortia and biobanks, including TOPMed and the UK Biobank. Applied these methods to find genetic modification of the relationship between nutrition and lifestyle exposures and cardiometabolic disease risk. Implemented and shared open-source software tools, cloud workflows, and analysis results to advance the field and promote reproducible science.

Doctoral Student 2016 - 2019
JM-USDA Human Nutrition Research Center on Aging at Tufts University, Boston, MA
Advisor: José M. Ordovás, Ph.D.
Doctoral Thesis: Integration of genomics, epigenomics, and diet for cardiovascular risk prediction
Assembled epigenome-wide predictive models for incident cardiovascular disease that are synergistic with traditional risk scores. Demonstrated that DNA methylation may act as a “molecular recorder” of cumulative risk factor exposure and that epigenomic risk predictors may be synergistic with traditional risk scores. Provided proof-of-concept for the prediction of response to dietary fat using genome-wide gene-diet interaction results.

Master’s Student
JM-USDA Human Nutrition Research Center on Aging at Tufts University, Boston, MA 2015 - 2018
Master’s Directed Study
Developed a pipeline based on quantitative structure-activity relationship machine learning models to identify targeted uses of food compounds. Published an open-source software tool and an associated manuscript.

GRANTS AND FUNDING

K01 Research Scientist Development Award (NIDDK) – PI (\$750k over 5 years) 2022 - present

| | |
|---|------|
| BioData Catalyst Fellowship (NHLBI) – PI (\$60k for 1 year) | 2020 |
| Gerald Cassidy Student Research Award (JM-USDA HNRCA at Tufts University) – MPI | 2018 |

Training fellowships

| | |
|--|-------------|
| Harvard T32 Training Program in Endocrinology (NIDDK) – funded trainee | 2020 - 2021 |
| Tufts T32 Training Program in Nutrition and Cardiometabolic Disorders (NHLBI) – funded trainee | 2016 - 2019 |

HONORS AND AWARDS

| | |
|--|---------------------|
| Early Career Abstract-based Travel Awards – CHARGE Consortium | 2022,2023,2024,2025 |
| Abstract-based Travel Award – Precision Nutrition Forum | 2024 |
| Advocacy Certificate for Human Genetics and Genomics – ASHG | 2022 |
| Early Career Investigator Achievement Award – CHARGE Consortium | 2022 |
| Early Career Educational Travel Award – American Society for Nutrition | 2021 |
| Semifinalist, Charles J. Epstein Trainee Award – American Society for Human Genetics | 2021 |
| Emerging Leaders in Nutrition Science Award – American Society for Nutrition | 2021 |
| Finalist, Postgraduate Research Award Competition – American Society for Nutrition | 2021 |
| IMPACT Fellowship – MIT IMPACT program | 2018 |

MENTORSHIP AND TEACHING

Mentorship

James Hu, Intern, Broad Institute 2025
Primary mentor for summer project focused on genetic epidemiology.

Paul Hanson, Analyst, Massachusetts General Hospital 2024 - present
Supervise on genetic epidemiology projects (50% FTE)

Julie Gervis, Research Fellow, Massachusetts General Hospital 2023 - present
Mentor on genetic epidemiology and gene-diet interactions.

Richa Jain and **Rachel Sussman**, master's students, Harvard School of Public Health 2024
Co-supervised Health Data Science capstone project (with Dr. Tamar Sofer).

Caiwei Tian and **Charlyne Burki**, master's students, Harvard Medical School 2022 - 2023
Co-supervised master's thesis projects (with Dr. Chirag Patel). Resulted in one publication per student, focusing on physical activity in the UK Biobank.

Joanna Lin, Undergraduate, Bowdoin College 2020 - 2021
Resulted in co-first author publication on gene-environment interactions for COVID-19 severity.

Teaching

Instructor, Harvard School of Medicine 2024 & 2025

Course: Pathways, Genetics Discipline (PWY 100)
Co-led discussion-based classes for first-year medical students.

Guest Lecturer, Friedman School of Nutrition at Tufts University 2025

Course: Precision Nutrition (NUTR 248)
Taught a class focused on gene-diet interaction concepts.

Guest Lecturer, Harvard School of Public Health 2025

Course: Precision Nutrition (NUT 250)
Taught a class focused on innovations in gene-diet interaction analysis.

Teaching Assistant, Tufts Friedman School 2015 & 2016

Course: Graduate biochemistry (BCHM 0223)
Led twice-weekly review sessions for classes of 15+ students.

LEADERSHIP AND SERVICE

Director of Analytics, EPICORE Biobank and Analytics core, Department of Medicine, MGH 2024 - present

Founder and convener, Environment and Social Determinants of Health Working Group, TOPMed Program 2024 - present

Chair, TOPMed Program Annual Meeting, Bethesda, MD 2025

Reviewer, Pre-selection committee, Broad Institute Summer Research Program (for college students underrepresented in science) 2023 - 2024

Founder and organizer, Nutritional genomics discussion group, MGH/Broad Institute 2020 - 2024

Organizer, Omics in epidemiology journal club, MGH 2019 - 2021

Co-founder and organizer, "NewTriton" talk series, Tufts Friedman School (recognized with *Honos Civicus* university service award) 2015 - 2018

PEER REVIEW

Selected Journals (ad hoc)

PROFESSIONAL EXPERIENCE

InsideTracker, Cambridge, MA 2016 - 2019
Data Scientist

Analyzed large behavior and blood biomarker datasets from a commercial personalized nutrition platform. Led the statistical modeling and manuscript preparation for the company's first peer-reviewed publication. Developed a software tool for automated analysis and visualization of biomarker data that is now used across the company.

Tufts Medical Center, Boston, MA

2019 - 2019

Bioinformatician

Consulted on the content of reports for a machine learning-based biological analytics platform being developed within the Tufts Clinical and Translational Science Institute.
